

Denys Mogyliuk

Web developer

Built and shipped frontend for products with 10M+ daily active users. Architected React systems from scratch across ecommerce, AI tooling, and education platforms — modular enough that any developer can quickly contribute without extensive onboarding. Strong focus on fast delivery while maintaining long-term code quality and avoiding tech debt.

Experience

Niko Technologies

Position: Front-end developer
Duration: 11.2025 - current time
Impact:

- Architected frontend across 3 product lines (e-commerce, AI content generation, e-learning) — established clear module boundaries and maintainable architecture
- Reduced API overhead by ~40% and improved rendering performance by ~30% through TanStack Query caching and code splitting on high-load surfaces
- Shipped AI generation UI end-to-end: prompt workflows, generation history, content preview, and export pipeline
- Introduced Cursor AI into the development workflow, reducing delivery time by ~20% while maintaining code quality
- Participated in technical interviews, supported onboarding processes, and shared frontend best practices within the team

Description:

Worked in a product company building and scaling e-commerce platforms, AI-powered content generation systems, and online education products. Focused on frontend architecture, scalable user experiences, performance optimization, and improving product workflows. Collaborated closely with cross-functional teams to deliver business-oriented solutions and maintain high engineering standards.

Corpsoft

Position: Web developer
Duration: 4.2024 - 11.2025
Impact:

- Built scalable Next.js 15 frontend with SSR and Server Components.
- Delivered WebRTC speaking rooms for live pronunciation and conversation practice.
- Implemented WebSocket-powered multi-user interactions for real-time learning sessions.
- Built i18n foundation and RBAC admin dashboard for global usage and platform management.

Description:

Worked on a language-learning platform aimed at improving speaking and vocabulary skills. Delivered core features while ensuring the architecture remained adaptable to evolving requirements.

Skills

- Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Responsive Design
- Styling & UI: Tailwind CSS, Sass/SCSS, CSS Modules, Material UI, Bootstrap
- State & Data Layer: TanStack Query (React Query), Zustand, Redux, REST API, Axios
- Backend: Node.js, NestJS, PostgreSQL, AWS S3
- Performance & Scalability: SSR, React Server Components, Code Splitting, Web Vitals, Rendering Optimization
- Real-time Systems: WebSocket, WebRTC, Socket.IO
- Testing: Jest, React Testing Library, Playwright
- DevOps & Tooling: Docker, CI/CD, GitHub Actions, Git, Vite, Webpack

Languages

- **English** - Upper-Intermediate (B2)
- Ukrainian: native

Education

2013 **Odessa National Politechnical University**
HTML Academy

Memcra b

Position: Front-end developer

Duration: 2.2022 - 4.2024

Technologies and tools: JS, React JS, TypeScript, React Router, React Hook Form, Webpack, Lingui,

Impact:

- Built SPA architecture from scratch, covering routing, reusable UI patterns, forms, and product data flows.
- Integrated Google Analytics to improve funnel visibility and track conversion, feature usage, and drop-off points.
- Used Hotjar insights to identify user friction across product browsing and checkout-related flows.
- Set up Sentry error monitoring and frontend logging, helping the team detect, prioritize, and debug production issues faster.
- Improved responsiveness and perceived performance in key e-commerce flows by ~30%.

Description:

Contributed to a large-scale sportswear e-commerce platform with 10M+ daily active users, focused on product discovery, customer-facing flows, analytics, and production stability under high traffic.

Progressio agency

Position: Front-end developer

Duration: 7.2019 - 2.2022

Impact:

- Delivered multiple SPAs from zero to production, owning architecture, development, release, and iteration.
- Designed reusable frontend structure that other developers could extend without deep onboarding.
- Improved complex data-driven UX flows for client products, reducing friction in business-critical interfaces.
- Collaborated with designers to keep UX decisions consistent across products and reusable components.

Description:

Agency environment delivering multiple client projects, including a sports manager simulator and data-heavy web applications.
